

BELOW GROUND BOX

Below Ground Composite Meter Boxes

ECONO BOX

Main characteristics

Used to accommodate 15mm and 20mm composite meters in a light duty composite construction

Lockable lid, with 15mm or 20mm composite fittings and 15mm or 20mm composite ball valve

No scrap value for the meter and the box minimises theft and tampering

Optional compression fittings for HDPE pipe

Simple and easy installation

Application

All complete Econo boxes are assembled with fittings and pressure tested reducing the possibility for undetected leaks

Designed to be installed level with the ground

Very robust construction protects meter against vandalism and raffic damage
