

Boschhoek *Berglandgoed Mountain Estate*

2-Way Radio Communication Network

To complement our wifi network on the estate, we have created a 2 Way Radio Communication Network between the Estate Manager, Home Owners, Community Police Forum (CPF) and the local Fire Protecting Agency (FPA).

If you would like to join this network, 2 options are available:

1. Complete Connection – (permanent residents will benefit from this option)

This include connections to:

- Estate Manager
- Other Home Owners
- CPF - This will allow you access to repeaters to enhance your signal from Vaalwater all the way to Pretoria. This is an emergency channel and a fee of R50 pm will be payable to the CPF group.
- FPA – Should a fire be on or close to the estate
- You can also have a private channel between you and your family, should you have more than 1 radio.

2. Local Connection – (for weekenders)

This include connections to:

- Estate Manager
- Other Home Owners
- FPA – Should a fire be on or close to the estate
- You can also have a private channel between you and your family, should you have more than 1 radio.

Contact the Estate Manager should you have any queries!
